

Sector : Energy & Utilities

energjsme

Energisme offers a set of software and hardware solutions to control the energy consumption of buildings and industrial processes.

PROBLEM

Users of the Energisme platform are billed monthly. The management of these **recurring invoices** represented many hours of work for the accounting department, and there were sometimes **issues with reliability**, such as double invoicing, or **errors in the amounts**. In order to save time and increase security, the company needed a system that would **simplify and automate recurring invoicing**.

SOLUTION PROVIDED

The automation of recurring billing has been implemented through the deployment of **subscriptions** and **process builder**. The Sofacto application thus manages the generation of documents, the automation of renewal dates and the sending of reminder messages. The accounting department has gained in **efficiency** and **peace of mind**.

DEPARDIEU Thibault

Director of
Operations

Saving time and peace of mind

“We have just deployed the Sofacto application which will undoubtedly save us a lot of time in managing our invoicing. The application perfectly meets our desire to optimize our invoicing processes and facilitate exchanges between the Finance and Commerce teams.

In addition, the technical monitoring carried out by the Sofacto team in the deployment of their tool in our org is great! Our main contact has in fact always shown great responsiveness and flexibility. I highly recommend this App! ”

MAIN FEATURES DEPLOYED

- Export of entries
- Automation of recurring invoicing
- Subscriptions and process builder
- Establishment of BCPs (Prepaid Products)
- Implementation of the price revaluation on the index SYNTEC at the subscription level
